4. (cancelled)
5. (cancelled)
6. (cancelled)
7. (cancelled)
8. (currently amended) A device for dampening a vibratable surface comprising: ~~The device of claim 1 further including~~

a patch comprising a resilient, pliable, adhesive body and an integral flexible base; and

a second patch, the second patch for stacking on the first patch, the first patch for attaching to the vibratable surface.
9. (cancelled)
10. (cancelled)
11. (currently amended) A device for dampening a vibratable surface comprising: ~~The device of claim 4~~

a patch comprising a resilient, pliable, adhesive body and an integral flexible base, wherein the base is foam; and

wherein the patch includes a top and bottom surface and the foam is closer to one of the top surface or the bottom surface than the other.
12. (cancelled)
13. (original) A method of manufacturing a patch for application to a vibrating surface, the method comprising the steps of

providing a flat surface;

applying the polyurethane mix to the flat surface laying a sheet of base material onto the polyurethane mix; and allowing the polyurethane mix to cure.

14. (original) The method of claim 13 wherein the providing step includes the step of providing a release sheet on the flat surface.
15. (original) The method of claim 14 further including, after the laying step, a step of removing any trapped air from the mix prior to curing.
16. (original) The method of claim 15 further including the step of cutting the cured/mixed sheet to a pre-selected shape.
17. (original) The method of claim 16 wherein the pre-selected shape is a rectangle with an area between about 1 sq. inch and 12 sq. inches.
